

8mm Wetroom Panels

To create a minimalist contemporary wetroom, there are various unique designs to suit everyone's needs. For a complete minimalist option there is the stunning corner panel, which can be installed to a shower tray, or straight to the floor for ease of access. A stylish addition to the wetroom can be an end panel which provides a more enclosed showering space. Additional support can be offered with an optional bracing bar which can be cut to the required length and a return panel can also be added to the design to guide the water back into the showering area. An adjustable foot is also included for supporting the fixed 'L' return panel on a standard tray if required and an inward pivoting 'L' return panel is now available.

Specifications of wetroom panels:

- Height: 2000mm
- Glass Thickness: 8mm
- Reversible for left or right hand applications
- A stylish low level brace bar can be purchased separately if required
- Suitable for use with power showers
- Due to the nature of the product water integrity cannot be guaranteed - please consult your installer
